

## Observing night checklist

- 1) Wear plenty of warm clothes. Long pants, long sleeves, closed-toe shoes or boots, jacket and hat are the starting point.
- 2) Consider upgrading to a heavier jacket and scarf. It may REALLY be cold.
- 3) Bring your copy of Lab 51 and its prelab, all stapled together.
- 4) Bring a pencil, eraser, and something firm to write on, like a clipboard or notebook.
- 5) Adjust your schedule to show up to ST2 by 6:15pm, as you will be learning critical, need-to-know information on how to operate your telescope. **DO NOT BE LATE!**
